Senior Full-Stack Engineer with over 10 years of experience in web development, specializing in React/Next.js ecosystems and the integration of generative AI for digital product optimization. I am looking for opportunities to reinvent how we use technology through Artificial Intelligence.

Working Experience

Groupon | Team Lead & Senior Full-Stack Engineer | July 2024 - Now

- Participated in the development of a new website from scratch using Next.js, TailwindCSS, and GraphQL.
- Integrated AI tools (OpenAI, LangChain) for SEO optimization and embeddings-based content categorization.
- Designed the base architecture and Page Builder flow for internal teams.

Tech Stack: React · Next.js · TailwindCSS · GraphQL · OpenAI · LangChain

Olympic Channel Services | Team Lead & Senior Full-Stack Engineer | Feb 2022 - July 2024

- Built a modular Page Builder and a reusable components framework for editorial teams.
- Integrated LLM-based SEO optimization to boost organic traffic.
- Collaborated closely with international teams to increase publishing efficiency.

Tech Stack: React · Styled Components · NestJS · GraphQL · OpenAI

Colba Technologies | Front-End Lead Engineer | Jan 2020 - Jan 2022

- Designed and developed a maintenance tool for a major Swiss e-bike company (**MG Biketec**).
- Enabled USB-based diagnostics, firmware updates, and component testing.
- Led the front-end team and set technical standards.

Tech Stack: Angular · Socket.io · .NET Framework

PFS Group | Team Lead & Full-Stack Engineer | Sep 2016 - Dec 2019

- Migrated legacy Java applications to Angular and NestJS.
- Delivered a legaltech document management platform that scaled into 3 internal dev teams and many different clients..
- Implemented BPMs using XState for automated legal workflows.

Tech Stack: Angular · NestJS · GraphQL · Socket.io · XState

Irontec | Full-Stack Engineer | Jun 2014 - Aug 2016

- Developed call center solutions adopted by major companies such as **Eroski Group**.
- Implemented real-time dashboards and Node.js services for telecommunication platforms.

Tech Stack: Angular.js · Node.js · Socket.io

Personal Projects

Gotchu — A virtual pet that gamifies productivity and daily tasks, evolving throughout the process and integrated with LLM agents.

https://marketplace.visualstudio.com/items?itemName=aitorllj93.v-pet — Raise a small Virtual Pet inside your editor and let it accompany you while you code.
